Protein Metrics End User License Manual

Introduction

This manual explains to the end user how to activate a license for Protein Metrics applications. It also describes other license-related operations, including returning, viewing, and rehosting a license.

Types of Licenses

Protein Metrics applications employ three types of licenses. A local license server (LLS) license is hosted on a local server. LLS licenses are part of a pool of floating licenses that are managed by the server and are not installed on individual machines. An activation ID for an LLS license begins with the string "s-". For details about this type of license, see the PMI Local License Server Manual. The other two types of license are Node-locked licenses. This manual focuses on these licenses. Node-locked licenses are tied to specific machines and may also be tied to individual user logins.

The two types of node-locked licenses are:

- Individual: An individual-based license is limited to one user on a specific machine. This is also called 'named user' license as it restricts the use of the software to the user who activated it. Any other user logging into the same machine would not be able to use the software. An activation ID for an individual-based license does not begin with the string "m-" or "s-".
- **Machine**: A machine-based license allows all users who can login to the machine to use the software. No restriction can be placed on who can or cannot use the software. Individual machine-based licenses can be returned and re-hosted to a different machine as needed. A machine license requires administrative privileges to be activated. An activation ID for a machine-based license begins with the string "m-".

Types of Operations

There are several operations that an end user can do with a license:

- Activation: enables specific applications in the software suite. Activations can be done online or offline.
- Return: allows return of a license back to Protein Metrics. Returns can be done online or offline.
- Rehost: after a license is returned, that license can be activated on another machine.
- **View**: provides detailed information about all licenses registered to a given PMI software installation.

Activate a License

A license can be activated online or offline.

Online activation

The simplest form of license activation is online. This can usually be done in minutes using an activation ID. To activate a license online:

1. Click the **Help > Register** menu on the toolbar.

2. In the License Activation dialog, select I want to activate my license. Click Next.

nterivation	×			
Please choose an option from below	PROTEIN METRICS Powerful software for protein characterization			
I have a Node-locked license (i.e. the licen	se is tied to a specific computer)			
I want to activate my license (I have	my Activation ID ready)			
I want to return my license in order machine (I have my Activation ID rea	I want to return my license in order to re-host on a different machine (I have my Activation ID ready)			
I have a Shared-Seat license (i.e. the licen Named Users, one at a time; a floating licens I want to point to the license server	ise is shared between a group of e) URL			
I want to see my Licensing Information				
Need a demo activation or have questions? Email register@proteinmetrics.com or contact us via our website.				
	< Back Next > Close			

3. Complete the form and enter the Activation ID. Make sure **Online Activation** is selected at the bottom of the page. Click **Activate** to complete the online activation. An individual-based license (which does not begin with "m-" or "s-") should activate immediately.

4. To activate a machine-based license, accept the User Account Control (UAC) permission.

A machine-based license (which begins with "m-") allows multiple users on a single computer to share one activation license. Additionally, the user needs to have administrator privileges on the machine to complete the activation.

5. The activation process may take a few moments. A message displays if the activation is successful.

🧇 Onli	ine activation	×
	Online activation successful!	
	1 new products(s) have been received: Byomap, valid until 2020-01-31, upgrade support until 2020-01-31	
	ОК	

6. If the activation is successful, the title on the top of the application window will be updated with the registered version and the number of days left on that license.

PMI-Byos - Protein Metrics Inc. - Registered (v3.6-0 x64) - Days left: 86.5

7. If the activation is unsuccessful, an error message will appear. Please take a screenshot and contact support@proteinmetrics.com for help.

Sometimes a user cannot or chooses not to connect the host machine to the Internet. In this case, the software can be activated offline. To activate a license offline:

- 1. Click the **Help > Register** menu on the toolbar.
- 2. In the License Activation dialog, select I want to activate my license. Click Next.

11. If unsuccessful, an error message will display. Please contact support@proteinmetrics.com for help.

Return a License

Sometimes a license activation ID needs to be returned. For example, an activation ID must be returned to move a license from one computer to another. An activation ID can be returned using online or offline procedures.

Online return

To return a license online:

- 1. Click the **Help > Register** menu on the toolbar.
- 2. In the License Activation dialog, select I want to return my license. Click Next.

- 10. The offline return process is now fully complete.

View License Information

Many of the steps outlined above require use of the license activation ID. Additionally, license activation failures create error messages that can help trouble-shoot problems. To view the activation ID and other license information:

- 1. Click the **Help > Register** menu on the toolbar.
- 2. In the License Activation dialog, select I want to view my license information. Click Next.

Move license to another machine (Rehost)

To move license from computer to another, please follow the procedures from the sections above:

- Return the license from the old machine
- · Activate the license on the new machine

Tips

Follow offline request-response order

If you send us multiple offline requests, then either **load each response in chronological order** or **load the latest response** only. Each response contains all current licenses.

Load offline response once

Do not load one offline response files multiple times, as this has no effect. If you would like to repeat the process, please start over with a new request.

Do not edit the Shared-Seat license tab

If you have an individual or machine-based, node-locked license, please do make any entries to the Shared-Seat license area. This can interfere with the use of the products.
